Application Instructions for Postdoctoral Positions for 2005–06

The Statistical and Applied Mathematical Sciences Institute (SAMSII) is soliciting applications from statistical and mathematical scientists for up to five postdoctoral positions, to begin in September, 2005 or January, 2006. The deadline for full consideration is February 15, 2005, although later applications will be considered as resources permit. Appointments may be made at any time.

SAMSII accepts only electronic applications. Applications consist of four components:

Basic information, including addresses and citizenship, as well as the names, affiliations and E-mail addresses of the three people who will write letters on your behalf;

CV, listing of academic degrees, publications and other professional activities;

Statement of interest, a one-page document responding to the criteria and SAMSII programs listed on the postdoctoral announcement;

Three letters of reference from those familiar with your education background and scientific accomplishments.

IMPORTANT! Please prepare the files containing your CV and statement of interest before you begin the application process, because you will be taken directly from entry of the basic information to the file upload process. These should be PDF files if possible, although Microsoft Word and PostScript are also acceptable. *Files whose length exceeds 1 MB will be rejected*, and you will be required to start the application process over from the beginning, so be sure that your files do not exceed this limit.

Letters of reference should be E-mailed to postdoc-letters@samsi.info, with a subject line of the form "Letter of Reference for [Your Name]."

To enter the basic information and upload files, go to the SAMSII web site:
