

“Goals and Outcomes” Document for Working Groups

About a month into each new program, SAMSI asks each Working Group to produce a document under the title “Goals and Outcomes”. Upon request, please send the SAMSI Director, or the Directorate Liaison for your program, the following information:

1. Name of working group and program.
2. Main WG participants and their affiliations (including academic departments)

WG leader(s):

Webmaster(s):

Post-docs:

Graduate Students:

Other active members:

3. Topics and goals of the WG: give a brief description
4. If applicable: Projects/topics chosen by postdocs and SAMSI grad fellows. Please provide a short description of the individual research projects (postdocs and grad fellows should have chosen a concrete project that is likely to result in publishable research and can be completed by the end of the program).
5. Sources of data
6. List of past as well as possible future discussion or presentation topics in WG meetings. For purposes of future reports, later in the year, a webmaster or WG leader should record this information throughout the program.
7. Any other past or proposed activities

This material may be prepared in any standard word processing format, including Latex or Word. If you do it in Latex, please send the raw Latex file as well as a pdf, to facilitate subsequent editing for SAMSI reports to NSF.
