

SEMESTER-LONG PROGRAM

Program on Causal Inference

This is a **semester-long program** to be presented in the **spring of 2020**. There will be significant themes regarding medical and health applications. Much of the new work in causal inference entails modern machine learning tools, and this perspective will be important to the program.

- Get Involved at our Opening Workshop:
December 9-11, 2019
- Working groups associated with this semester-long research program will include local research fellows and remote participants
- More information at:
www.samsi.info/sem-cas-inf

Program Leaders:

- Fan Li (Duke University)*
- Alex Volfovsky (Duke University)*
- Ilya Shpitser (Johns Hopkins University)*
- Francesca Dominici (Harvard T.H. Chan School of Public Health)*

SAMSI Directorate Liaison:
Greg Forest

SPRING 2020
